

Project planning – Pessi Raunio

Sport exercise hosting platform.

Users are able to add their own training plans and categorize them accordingly (by sport, goal etc). All the users can search by category (training style, sport) and use the training plan.

Users are able to see the training plans (sneak peek) but are not use (copy) them without an account.

(Optional) Users are able to use the training within the application and add notes to the plan. Notes are automatically saved to the database and the plan for the user.

API endpoints
